Selthing originally had 5 billion inhabitants, as well as a military base and scout base. The fall of the Imperium and the Virus destroyed the majority of the population - mostly clustered in arcologies. The survivors on the planet now number 90,000, and are primarily from a minor human race which had been on the planet previously and are well adapted to the harsh environment. Very tall and thin, deep black skin color, and large chest cavities allowed them survive outside the arcologies when they fell. In addition, the minor human race on the planet had a very high probability of psionics. In the resulting fall of the arcologies, a psionic cult arose in the survivors which effectively replaced the religious dictatorship.

The psionic cult is a collection of 30,000 active psionics (1/3 the total planet population) and is known as the Ascendancy of the Mind - more often just called "The Ascendancy". The very often do not speak directly, but communicate through people who are not psionic - local inhabitants are quite used to this and it is a particular honor among those not gifted to be chosen to speak for the ascendancy.

Scavenging Technology Table
